Emergency stop relay and safety gate monitor in accordance with EN 60204-1 (VDE 0113-1), 12/97 and IEC 60204-1, 10/97

Features

- Monitored manual or automatic reset can be selected
- 2 safe and 1 auxiliary semiconductor output
- Auxiliary output can also be used as a diagnostic output
- an AND and an OR input for logic AND/OR connections between several units
- Option for detecting shorts across the input contacts
- Applications in accordance with EN 954-1, 07/96, category 2, 3 or 4
- Self-test after U_B is supplied
- Continuous self-monitoring
- Regular switch-off test of the safety outputs

Technical details	PNOZ e1.1p
Electrical data	
Supply voltage	24 VDC
Tolerance	80 ... 125 %
Power consumption	no load: 2 W
Residual Ripple DC	20 %
Outputs	2 safety outputs 1 auxiliary output
Switching capability	$U_B \leq 26.5$ V: 2 outputs under load: 2 A/50 W 1 output under load: 2.7 A/70 W $U_B > 26.5$ V: 2 outputs under load: 1.5 A/40 W 1 output under load: 2.2 A/50 W
Voltage and current at input and reset circuits and feedback control loop	
auxiliary output and test pulse outputs	24 VDC, 5 mA
AND/OR inputs	24 VDC, 5 mA
Times	
Delay-on energisation	monitored reset: 180 ms automatic reset: 100 ms
Delay-on de-energisation	max. 35 ms
Switch-on delay at S35/S36	120 ms
Switch-on delay	3 s (on initial reset once U_B is supplied)
Simultaneity channel 1/2	∞
Max. Supply Interruption before de-energisation	max. 20 ms
Environmental data	
Storage temperature	-25 ... 70 °C
Mechanical data	
Cross section of external conductors	
1 core	Flexible: 0.25 ... 2.5 mm ²
2 core with the same cross section	Flexible with crimp connectors, no plastic sleeve: 0.25 ... 1 mm ² Flexible, without crimp connectors or with TWIN crimp connectors: 0.25 ... 1.5 mm ²
Torque setting for terminals	0.5 ... 0.6 Nm (screws)
Dimensions (H x W x D)	87 x 22.5 x 121 mm
Weight	170 g

Description

- 22.5 mm P-99 housing, DIN-Rail mounting
- Semiconductor outputs, short-circuit proof:
 - 2 safety outputs
 - 1 auxiliary output
 - 2 test pulse outputs
- one AND input, one OR input
- Connections for
 - E-STOP button
 - safety gate limit switch
 - evaluation device for proximity switches
 - safety mats and connecting blocks made by Haake
 - Reset button
- Processes signals from output switching elements on safety mats or light barriers
- Auxiliary output can also be used as a diagnostic output

It is possible to program the driver for reading diagnostic data yourself. However, the CD „PLC Drivers for PNOZelog“ is also available. This contains pre-programmed drivers for the following controllers:

- SIMATIC S7
- LEDs for switching status and faults in channel 1/2 and for supply voltage
- Shorts across the input contacts are detected by means of test pulse outputs
- Increase in the number of safety contacts available by connecting expander modules

Operating modes

- Single-channel operation
- Dual-channel operation
- Automatic reset
- Monitored manual reset

External wiring

The AND input is not active in the examples below.

● Example 1

Single-channel emergency stop wiring with monitored manual reset without short-circuit recognition

● Example 2

Dual-channel emergency stop wiring with monitored manual reset without short-circuit recognition

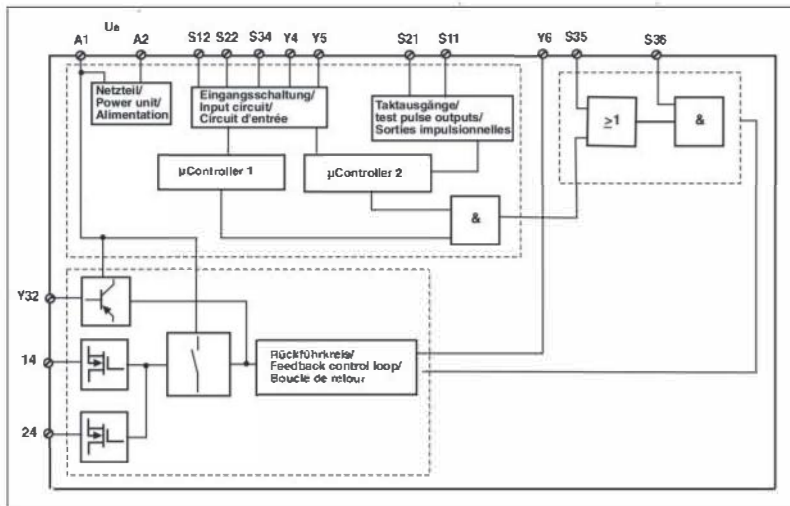

● Example 3

Dual-channel emergency stop wiring with monitored manual reset and shorts across the input contacts are detected

Internal wiring diagram

Category 4, EN 954-1 PNOZ e1.1p

0990 4040 832 msborna.com

● Example 4

Dual-channel safety gate control with automatic reset without start-up test and without short-circuit recognition

● Example 5

Dual-channel safety gate control with automatic reset and start-up test, shorts across the input contacts are detected

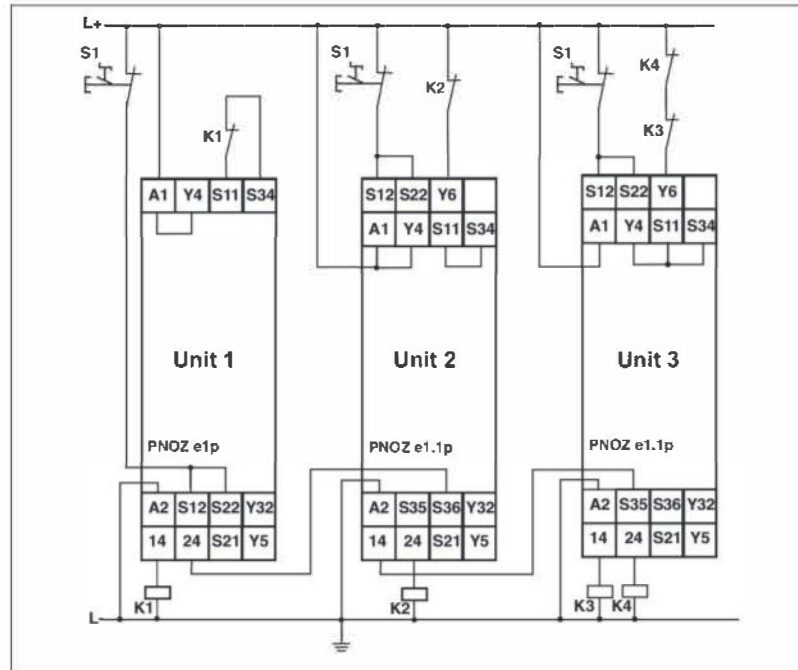

● Increase in the number of contacts

The number of output contacts can be increased by using expander modules or relays/contactors with positive-guided contacts.

Connection example

AND link Unit 1 and Unit 2, OR link Unit 2 and Unit 3, single-channel, automatic reset, without detection of shorts across contacts

- Key

S1/S2: E-STOP or safety gate switch
S3: Reset button

↑ Switch operated

General details	
Unless stated otherwise in the technical details for the specific unit	
Electrical data	
AC frequency range	50 ... 60 Hz
DC residual ripple	160 %
Contact material	AgSnO ₂
Continuous duty	100 %
Environmental data	
EMC	EN 60947-5-1, 11/97
Vibration in accordance with EN 60068-2-6, 01/00	Frequency: 10 ... 55 Hz, Amplitude: 0.35 mm
Climatic suitability	DIN IEC 60068-2-3, 12/86
Airgap creepage	DIN VDE 0110-1, 04/97
Ambient temperature	-10 ... +55 °C
Storage temperature	-40 ... +85 °C
Mechanical data	
Torque setting for connection terminals	0.6 Nm (screws)
Mounting position	Any
Housing material	Front: ABS UL 94 V0 Housing: PPO UL 94 V0
Protection types	Mounting: IP 54 Housing: IP 40 Terminals: IP 20

The units were tested in accordance with the standards applicable at the time of development.
